## **DETAILED ACTION**

### ***Response to Amendment***

1. Receipt is acknowledged of the proposed amendment and response, filed 30 Nov. 2005, a copy of which was re-submitted 5 Jan. 2006. Because the examiner indicated that the proposed amendment would place the application in condition for allowance during the telephone interview of 30 Nov. 2005, the amendment has been entered.
2. Claims 18-32 and 37-42 are now pending.
3. Upon further consideration, the subject matter previously indicated allowable lacks support in the originally-filed specification. Consequently, new grounds of rejection are set-forth below.

### ***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 18-32 and 37-42 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.
6. The limitation "at least two" layers does not have support in the specification. The only discussion of a single layer of foam curing into multiple layers is at page 10 of the specification. However, this only describes curing into an inner hardened shell, an intermediate structural and

insulative core, and an outer bonding layer. The disclosure of this embodiment does not support a structure curing into *only* two layers or *more than* three layers, as encompassed by the limitation “at least two.”

### ***Conclusion***

7. The prompt development of clear issues in the prosecution history requires that applicant's reply to this Office action be fully responsive (MPEP § 714.02). When filing an amendment, applicant should specifically point out the support for any amendment made to the disclosure, including new or amended claims (MPEP §§ 714.02 & 2163). A fully responsive reply to this Office action, if it includes new or amended claims, must therefore include an explicit citation (i.e., page number and line number) of that/those portion(s) of the original disclosure which applicant contends support(s) the new or amended limitation(s).
